About EuBion Corporation

EuBion Corporation is European manufacturer and supplier of Dietary Supplements headquartered at Warsaw, Poland. We specialize in product development, manufacturing and sales of Dietary Supplements based on scientifically proven ingredients. Established in 2014, we have kept our focus and strength towards developing products for everyday need of all age groups, from childhood to golden years. We manufacture and supply different dosage forms of **tablets, capsules, syrups, pediatric drops and sachets.**

Our Mission is manufacturing and sales of quality products of scientifically proven compositions in innovative dosage forms. Our products are developed with strong scientific evidences and findings. We constantly research and develop new product with same seriousness and enthusiasm like we did for the first time in 2014. These efforts have paved the way to establish ourselves as one of fastest growing company in preventive medicine.

Philosophy of EuBion is maximum outreach of **quality and affordable dietary supplements** across all continents through different type of business models. We work in B2B, B2C and out licensing business models, to cater need of different customers depending upon specific nature of their markets. We are **ISO 22000** and GMP certified company. At our disposal we have trained, highly qualified team, modern, well quipped premises and sophisticated machinery which meets all the requirements of EU regulations and legislations. Our policy is to continually keep pace with the best manufacturing practices to be found on the market and to supply customers with best products based on best ingredients.

Customer Satisfaction is key to our success. Adopting suitable manufacturing process and ingredients to ensure high bioavailability is our objective. Doctors and customers appreciate efficacy of our products even for most simple form of products. Through the use of rich experience, latest manufacturing technology and modern research facilities, our products are proven, effective and are appreciated by consumers all over the world. We dedicate our efforts for constant improvement based on market trends and changing quality norms.

We have a number of successful **Collaborations and Licensing** arrangements. Our approach to partnerships has been path-breaking and successful in terms of product and market coverage and leveraging each other's partnership strengths. They are an essential and integral part of our research and business strategy. We align our capabilities with business opportunities and everything we do is based on being easy to work to ensure mutual success. We manufacture and supply products to one of most reputed companies in global markets.

Product Development is continuous process at **EuBion Corporation**. We intend to grow by developing new products and new dosage forms whether it's for our customers or our partners. Continuous development helps us to increase our product range and simultaneously range for dosage forms also. Our R&D team is capable of developing any new product under regulations of Dietary Supplement. We continuously engage in new projects to aid technology development, development of new molecules, chemical process enhancement and innovative drug delivery systems development. You can contact us in our endeavor of developing new product under any dosage form of your interest.

Functional Teas

Functional teas are blends containing only natural ingredients - herbs, fruits, vitamins and minerals. Stress, life in a constant rush, environmental pollution negatively affects our well-being. Functional teas help regenerate a tired body and cleanse it of toxins. The vitamins and minerals contained in them support immunity and internal balance, have healing properties.

Herbs and fruits used for the production of teas are harvested with the greatest care and dried at low temperatures, which allows them to preserve their properties and amazing aroma and taste.

Slimming Tea

Slimming Tea is a unique composition of ingredients supporting slimming and digestion for people who want to change the appearance of their figure.

- Mint supports the functioning of the digestive system.
- Senna supports the functioning of the intestines and supports the physiological cleansing functions of the body.
- Magnesium is responsible for electrolyte balance and supports energy metabolism.

Detox Tea

Purifying tea is a perfect tea for detoxification of body. Detox Tea is a tea created for people who struggle with stomach problems, constipation or excess body fat. Natural herbs and fruits contained in Detox Tea support the body's natural detox, cleansing the skin and protecting cells from oxidative stress.

Thyroid Tea

Thyroid tea is a mixture of carefully selected herbs which will support body in a natural way. Icelandic Lichen positively affects immune system, supporting its proper functioning. The addition of Valerian and Horsetail will improve the work of the heart and strengthen blood vessels. The appearance of skin is improved by the Nettle Leaf. Dandelion not only improves digestive processes and soothe stomach disorders but also have an anti-inflammatory effect.

Immune Tea

The natural ingredients in Immune Tea support the body in fighting infections. Elderberry flower and Chamomile contributes to the proper functioning of the immune system. Rose Hips are helpful with colds and supports defense mechanism. The addition of Vitamin C, Zinc and Vitamin B12 supports the work of immune system.

EuBion Medical

EuBion Medical is a range of products with objective of supporting treatment for a particular symptom through natural ingredients or herbs in a natural way. These products are developed under consultation with medical professionals and sold through pharmacies.
